GET HIRED.

GET TRAINED. GET WORKING.

"What started out as a simple summer job, ended up being a very enjoyable opportunity to work alongside other high school and college kids. Aura Aquatics has taught me valuable communication, leadership and management skills that I will carry forward into my professional career. They work with a number of private clubs around town which sets them apart from other lifeguarding experiences. I would highly recommend spending your summers working with Aura Aquatics. Not only will you earn extra money, but you will also make fun memories and lifelong friendships with a group of great individuals." —Peter S.
